18 May 2021

Voltaia signs a share purchase agreement to sell 187-megawatt wind projects to Brazilian utility Copel

Voltaia (Euronext Paris, ISIN code: FR0011995588), an international player in renewable energies, today announced the signing of a share purchase agreement for the sale of 100% of its 128 megawatt VSM2 and 59 megawatt VSM4 wind farms to the Brazilian utility Copel. The actual sale is scheduled for November 30, 2021, once the conditions precedent have been met.

Over the past years, Voltaia has pursued a strategy consisting in developing a high volume of competitive projects with the view of keeping some projects while partnering with strategic partners for others.

As of today, Voltaia owns 624 megawatts of operating wind farms and 187 megawatts of wind farms under construction at Serra Branca in Brazil, the world's largest wind-and-solar complex, with a potential of 2.4 gigawatts, developed entirely by Voltaia. In addition, Voltaia owns wind, solar and hybrid assets in operation and in construction located in the Brazilian states of Rio Grande do Norte, Bahia and Amapá, for a total of 223 megawatts.

In parallel, in Brazil Voltaia develops a pipeline of future solar, wind and hydro projects representing a total of 5,1 gigawatts as of end of 2020. This pipeline has been increasing over the past years, and important development milestones achieved since the beginning of 2021 will significantly expand further this pipeline. Voltaia will therefore continue to sell a big portion of its future projects.

The VSM2 and VSM4 wind farms are both part of the Serra Branca cluster. The wind farms will use the infrastructure developed and built by Voltaia, including the 500 kV transmission lines. VSM2 has just completed its commissioning, while VSM4, currently under construction, is expected to begin operations in June. Voltaia's teams will continue to operate and maintain both plants after the sale to Copel.

Copel is one of Brazil's leading utilities, serving 4.8 million customers in 395 municipalities and 1,113 localities (districts, towns and villages). This acquisition is in line with the Company's sustainable growth strategy in the field of renewable energy and is fully consistent with its recent investment policy approved earlier this year. Copel is listed on the São Paulo, New York and Madrid stock exchanges and its main shareholder is the State of Paraná.

A long-time partner of Voltaia, with a minority stake in Voltaia's SMG wind farm (108 megawatts) since 2015, Copel was recently one of the counterparties of the long-term power sales agreements totaling 270 megawatts for the SSM 1&2 solar farms.

"This share purchase agreement shows our partners' renewed confidence in our quality projects and our continuous strategy to develop a large amount of projects, providing additional revenues for our Services activity. VSM2 and VSM4 will continue to create value for the Group, as the maintenance of both wind farms will be handled by Voltaia's teams," said Sébastien Clerc, Voltaia's CEO.

About Votalia (www.votalia.com)

Votalia is an international player in the renewable energy sector. The Group produces and sells electricity generated from wind, solar, hydraulic, biomass and storage facilities that it owns and operates. Votalia has generating capacity in operation and under construction of more than 1.4 GW and a portfolio of projects under development representing total capacity of 9.7 GW.

Votalia is also a service provider and supports its investor clients in renewable energy projects during all phases, from design to operation and maintenance.

As a pioneer in the corporate market, Votalia provides a global offer to private companies, ranging from the supply of green electricity and energy efficiency services to the local production of their own electricity.

The Group has more than 1,130 employees and is present in 20 countries on 4 continents and is able to act worldwide on behalf of its clients.

Votalia is listed on the regulated market of Euronext Paris, compartment B (FR0011995588 – VLTA) and is part of the Enternext Tech 40 and CAC Mid & Small indices. The Group is also included in the Gaïa-Index, an index for socially responsible midcaps.
