

Voltalia wins additional 27 MW of wind power in Brazil

Voltalia (Euronext Paris, ISIN code: FR0011995588), renewable energy based electricity producer, announces the win of 27 MW in the electronic auctions organized by the Brazilian federal authorities on November 13.

With a 27 MW capacity, the project is located in Vila Acre, in the Areia Branca municipality, next to some of Voltalia's existing facilities. It will benefit from synergies with those power plants: construction will immediately follow the completion of ongoing building works and the new facility will use the same transmission line Voltalia built in 2014.

Under the terms of the contract, production will start in November 2018 at the latest, when the 20-year electricity sales contract comes into effect.

This new project adds to Voltalia's strong presence in the area, where it has tied long-term relationships with the local population.

"This contract consolidates our position as major player in the region. It secures new revenues, thus contributing to our growth in the coming years", comments Sébastien Clerc, Voltalia CEO.

About Voltalia (www.voltalia.com)

- *Producer of electricity from renewable energy, Voltalia develops, owns and operates power plants representing a total installed capacity of 283 MW in four energy segments: wind, solar, hydro and biomass.*
- *Voltalia is present in metropolitan France, Brazil, Greece, French Guiana and Morocco.*
- *Voltalia is listed on Euronext Paris since July 2014 (FR0011995588 – VL TSA).*
