Voltaia starts a share buyback program and confirms its confidence in its prospects

Voltaia (Euronext Paris, ISIN code: FR0011995588), international player in renewable energies, announces the start of its share buyback program.

This share buyback program is being launched pursuant to the authorization granted by shareholders during the May 24, 2018 Annual General Meeting and is the opportunity for the management team to reaffirm its confidence in its ability to reach the 2020 targets and, beyond, in the Group's strong and profitable growth prospects.

In fact, Voltaia announced on September 4 that its 1 GW target was now secured thanks to recent wins in Brazil, Africa and in France. The Group will then have an installed base allowing to benefit from significant economies of scale, further increased by services delivered to third-party clients.

"Confident in our prospects, we are taking advantage of current market conditions and the exceptionally low share price to start this share buyback program. Limited in size, this program will notably enable to cover most of our 2016 and 2018 performance share plans, while preserving the interests of all of our shareholders" comments Sébastien Clerc, Chief Executive Officer of Voltaia.

Voltaia has signed today a share buyback agreement with an investment service provider, authorizing it to purchase shares on the stock exchange on dates deemed appropriate.

Next on the agenda: Q4 revenues on January 23, 2019

About Voltaia (www.voltaia.com)

- Voltaia is an international player in the renewable energy sector. The Company produces and sells electricity generated from wind, solar, hydro and biomass power plants; it owns a total installed capacity of 524 MW as of today.
